PROFESSIONAL SUMMARY

Experienced Full Stack Developer skilled in both front-end and back-end development, with expertise in design and user experience. Specializes in UiPath and RPA, excelling in workflow automation. Demonstrates collaborative skills and a commitment to delivering top-notch solutions. Eager to contribute skills to innovative projects.

TECHNICAL SKILLS

Languages: Python, HTML, CSS, Javascript
Frameworks: Flask, React JS, Bootstrap, JQuery
Databases: Mysql, Redis, Clickhouse DB
Tools: UiPath, Postman

EXPERIENCE

Software Developer | Catnip Infotech Private Limited, Bangalore   June 2023 - Present

Client – Lynks Logistics

- Engineered and deployed an advanced automation solution integrating web bots, Excel bots, and API integrations, driving a 30% increase in efficiency for sales order upload and return processes.
- Seamlessly streamlined automation workflows with diverse UI web pages, achieving a 60% reduction in data transfer time and enhancing interaction across multiple systems.
- Executed comprehensive testing and debugging, resulting in a 95% accuracy rate and halving error occurrences within the automation solution.
- Continuously optimized and supported systems, resulting in a 25% improvement in overall system performance and alignment with evolving business needs and updates.

Client – Shriram Properties Limited

- Accomplished a Proof of Concept (POC) for SAP Automation, showcasing expertise in invoice extraction and process optimization.
- Initiated HR Automation initiatives utilizing SAP, significantly enhancing operational efficiency.
- Secured project implementation post-POC, demonstrating the ability to translate conceptual automation solutions into practical applications.
- Supported additional projects beyond primary client engagements, resulting in a 20% increase in overall team productivity and client satisfaction.

Software Engineer | Digikriya Private Limited, Bangalore   January 2021 – March 2023

- Designed and implemented comprehensive end customer solutions.
- Implemented middleware modules, reducing data synchronization time by 30% and enhancing overall system performance by 25%.
- Developed and programmed a robust API middleware module using Python, optimizing data retrieval and storage processes within the database, leading to a 40% improvement in data efficiency.
- Collaborated closely with Subject Matter Experts (SMEs) to develop and update project specifications tailored to corporate client requirements, ensuring a 30% increase in project alignment with client objectives.
- Orchestrated the migration of UI/UX to React JS, resulting in a 50% improvement in user experience and scalability.
- Partnered with engineers to develop clean, scalable, and resilient frontend and backend solutions, contributing to a 40% increase in overall system reliability and performance.

AWARDS

Best Contributor of the Year | Catnip Infotech Private Limited, Bangalore   February 2024

EDUCATION

Bachelor of Technology | Kongu Engineering College, Erode   August 2017 – March 2021
